UNIMOG CORNER

*This load pictured above was a bit of a tight squeeze!
We had to fit a Muller trailer, a U1000 and a U1750 onto this low loader and as you can see,
we were a bit short of space! We finally managed it by taking the headboard off the trailer and
driving the U1000 up our ramps with its nose in the trailer! By the time everything was loaded,
we had about 2" to spare!!*

*Looking good! This U1500 pictured above came into our workshop a couple of weeks ago for some
routine work to be carried out and also to have our Fami 10" wood chipper fitted to it.
The unimog has recently had a paint job and looks fantastic! The tow hitch has also been
painted in red which finishes the mog of perfectly!*

*Well, that's all from me for this month!
Bye for now!
Emma*
